## PREFACE.

THE use of the orations of Lysias with different classes during the past thirteen years has more than confirmed my first impression of their great value in a course of Greek instruction. An edition of the orations contained in this volume was completed two years ago last winter, but the manuscript was destroyed while on its way to the printer by the burning of an expresscar. It had been begun at the suggestion of the late Professor Hadley, and a portion of the work had received the benefit of his critical revision, - one of the last of those unheralded services which that noble-hearted scholar, too humble and too great to covet fame, and setting all too low an estimate on his exhaustless stores of learning, was ever so generously rendering on every hand. The completion of my task for the second time - fulfilling but tardily the promise made to the publishers - has been delayed until the present by other imperative duties.

The work is especially designed as a reading-book in Attic prose, to follow the Anabasis. The fitness of Lysias' orations for this purpose will be better understood from the account given in the Introductory Sketch. In preparing the Notes it has been my chief aim to guide the student to a reasoned translation. It seems hardly
to be questioned that the value of translation as a mental discipline will depend mainly on the student's being able to give an intelligent account of his work, - to furnish not only the correct rendering, but the reasons for it. I have therefore made numerous grammatical references, particularly in the notes on the twelfth and the thirteenth orations, and on the twenty-second. The latter oration, and the narrative portions of the two former, will be found the most suitable for the use of younger classes. Advanced classes may profitably read the twelfth and thirteenth entire, not only for their historical value, but as specimens of argumentative composition in the forensic branch.

Some references have been made to larger grammars, and to works not accessible to the majority of students. Those teachers who read beyond their text-books will not object to these, nor to the occasional mention of parallel passages in orations not found in this volume.

Matters of fact and history have been explained to some extent, but not, it is believed, at so great a length as to interfere with the main purpose of the Notes. The Classical Dictionary and the Dictionary of Antiquities have been constantly referred to, and their use by the student is taken for granted throughout.

The text adopted is that of Scheibe (Teubner's edition). The few instances in which I have departed from it, in language or punctuation, are mentioned in the Notes. As regards the division of syllables, I have followed the rule of dividing compound words into the elements out of which they are formed ; e. g. $\pi \quad \lambda \epsilon \mu-\alpha{ }_{\rho} \rho \chi \varphi, \pi a \rho-$ eival. This method has reason as well as the authority of Curtius and many other modern grammarians in its favor.

Use has been made of all the best authorities to which I could procure access. Of the most service have been Reiske (the fifth and sixth volumes of his Oratorum Grecontm, Lipsiae, 1772) ; Rauchenstein (Ausgewählte Reden des Lysias, Sechste verbesserte Auflage) ; and Frohberger, (Ausgewählte Reden des Lysias, both the larger work in three volumes, and the abridged edition, which appeared last year). Frohberger's annotations, especially, have been a constant and indispensable help. Other commentators are mentioned in the Notes.

The elucidation of the chronology and history of the events referred to in the twelfth and thirteenth orations has been greatly aided by Scheibe's Die oligarchische Umwälzung zu Athen am Ende des peloponnesischen Krieges; Leipzig, 1841. The principal historical references in the notes are to the histories of Grote and Curtius.

In the preparation of the introductions, among other authorities, I have found of great value Friedrich Blass's Attische Beredsamkeit. While rewriting my Introductory Sketch Professor R. C. Jebb's two volumes on the Attic Orators from Antiphon to Iscos came to hand, bringing much fresh and stimulating suggestion. I am glad to call the attention of any who may read these pages to that work as one of the most useful contributions to the history of Greek literature that English scholarship has for many years produced. An interesting monograph on the style of Lysias is Des Caracteres de l'Atticisme dans l'Eloquence de Lysias, by Jules Girard, Paris, 1854.

My thanks are due Professor J. R. Boise, of the University of Chicago, for various timely suggestions. For information on certain legal technicalities and points of contrast between the ancient and modern codes, I am
indebted to Samuel J. Thompson, Esq., of Cincinnati, a gentleman who in spite of the demands of an exacting profession has kept fresh his interest in classical studies and the problems of the higher education. Especially do I desire to make full acknowledgment of the help I have received from my colleague in instruction, Mr. Charles Chandler. He has aided me in the revision of the larger part of the manuscript, and also in the proofreading. His accurate scholarship, combined with rare taste and judgment, has made his heartily rendered assistance of very great value, adding not a little to the service which I trust this book may render to classical students and the cause of sound learning.

## INTRODUCTORY SKETCH

OF

## LYSIAS AND HIS WRITINGS.

## I. THE LIFE OF LYSIAS.

Lysias, a native, though not a citizen of Athens, was a Sicilian Greek by descent, a son of Cephalus of Syracuse. The year of his birth is altogether uncertain. In the "Lives of the Ten Orators," a work formerly attributed to Plutarch, 459 B. C. is the date assigned, but there are reasons for believing it to be merely an unfounded inference on the part of the writer. The year $444 \mathrm{~B} . \mathrm{C}$. is the date fixed upon by K. F. Hermann after an exhaustive investigation of the chronology of the subject, and the greater number of modern critics are inclined to adopt his view. Others, as Westermann, fix the year so late as 432 . Rauchenstein, and more recently Jebb, lean to the ancient opinion. On the whole, the correctness of the year 444 as an approximate date is strongly favored by the fact that it best explains the few historical statements that have come down to us concerning Lysias and his father, and the relation in which they stood to their contemporaries. It is known that he lived to the age of eighty, - from 444 to 364 , if the date here assumed be the true one.

Cephalus, the father, was a man of wealth and culture who had been induced by Pericles to take up his residence in Athens. There four children were born to him, - three sons, Polemarchus, Lysias, and Euthydemus, and one daughter. His dwelling in the Piræus was the abode of hospitality ; Socrates and his friends often met at
the table of the genial old man. There Plato has laid the opening scene of the greatest of his works, the Republic, and Cephalus is honored with a worthy part in the conversation. In this home of luxury, culture, and rare discourse, Lysias remained till his fifteenth year, enjoying along with the youth of the most distinguished families the best education that Athens could afford.

The next seventeen or eighteen years were passed in Thurii, a flourishing Greek colony of Lower Italy, whither he had gone with his brother Polemarchus after their father's death. Of the extent and character of their business operations in that city we are not informed. Lysias gave himself chiefly to learned pursuits, his studies taking a rhetorical direction under Tisias, the famous rhetor of Syracuse. Rhetoric, the art of discourse, then embraced a wide range of topics; with the Sicilians it was, in a special sense, the art of beautiful diction (eivéreta). The studies comprehended under the name of rhetoric formed no small part of the intellectual movement of the age. Lysias threw himself with ardor into these studies, and soon became a proficient in the highly artificial and ornate style of the school in which he was trained. If we were to judge solely from Plato's representations in the Phædrus, his earlier productions must have displayed the defects quite as strikingly as the merits of this school. But the grounds are slender for taking the composition given in that dialogue as a specimen of the art of Lysias. It is more than likely that Plato's contempt for the sham rhetoric that filled the ears of the multitude with sounding phrases led him to do injustice to Lysias, who was reputed at the time of the composition of that dialogue to be the leading rhetor in Athens, and was therefore in Plato's view one of the chief promoters of a demoralizing tendency in literature and education.

The overthrow of the Athenian party in Thurii, after the destruction of the Sicilian Expedition, brought the two brothers back to Athens. This was in 41 I . Their lives seem hitherto to have been led in close intimacy, and they now continued their partnership, carrying on a large shield manufactory which employed a hundred and twenty slaves. It stood adjoining the residence of Lysias, in the Piræus. Polemarchus resided in the upper city. They also had real estate in Athens (three dwelling-houses are mentioned in the Oration Against Eratosthenes), funds that had been invested abroad, besides (in the year 404) a large sum of gold and silver coin
kept in Lysias's own house. But business was not allowed to absorb their attention. We find Lysias soon taking rank as the foremost rhetorician and speech-composer ( Iovoypáфos) in the city. It was a profession exposed to a certain degree of unpopularity, because, among other reasons, it was with many a money-making employment. In Lysias's case, however, it was during this period merely the employment of his scholarly leisure, being indeed about the only avenue to distinction open to a foreigner of his tastes and inclinations.

How his prospects were changed by the Year of Anarchy, how his brother was seized for summary execution by the tyrants, and all their property within reach confiscated, while he himself barely escaped by secret flight, - is best learned from the orator's own account in the Oration Against Eratosthenes. During the exile he proved his attachment to his native city, and his devotion to the cause of freedom. He rendered various services to the exiled democrats, and it is especially mentioned that he furnished to Thrasybulus while at Phyle two thousand drachmas, two hundred shields, and a reinforcement of three hundred hired troops. His services were not forgotten by Thrasybulus after the restoration; a decree was passed admitting him to full citizenship. But immediately afterwards, on account of some technical irregularity, it was reconsidered and rejected as illegal at the instance of a jealous opponent of Thrasybulus. Lysias remained therefore in his previous status as an ioorè $\eta_{s}$, a resident possessed of special civic privileges, but without suffrage or eligibility to office.

The year of exile over, he set himself first of all, after the re-establishment of the old order of government, to bring to justice the man most directly concerned in the murder of his brother. This was Eratosthenes, who was still in the city. It was a custom of ancient sanction that the nearest kinsmen of a murdered man should be his avengers, taking the necessary legal measures to secure the conviction and execution of the murderer. In order to accomplish this Lysias would be obliged to appear in person before a court of Athenian citizens, and that at a time when it was peculiarly difficult to gain an impartial hearing. Party spirit was never more rife; the civil war was over, but its clashing feuds and passions remained. For such business as was now in hand the training that Lysias had received was not the best. In an Athenian dicastery, and above
all at a time like this, the studied elegances and the well-turned phrases and periods of the Sicilian manner were ineffective weapons. The contests in the courts were like hand-to-hand fights, where every moment counted, and each stroke must be made to tell. In many classes of actions the law restricted each speaker to a certain time. There were also other more or less distinctly defined traditionary requirements as to the topics, the classes of arguments and their order, and the methods of appeal, while at the same time it was necessary to meet the demand of an Athenian audience for artistic excellence. But how well Lysias discerned the exigencies of the occasion as he prepared himself for this celebrated prosecution, and how he so mastered the situation, as, if not to gain his case, yet to create a new style of forensic oratory, and thereby, as Otfried Müller declares, to inaugurate a new era in the history of Attic prose, - this is to be learned from the Oration Against Eratosthenes, the first given in this volume. It is historically the beginning of the school of oratory that reached its most perfect development in Demosthenes. From the time of this oration a new style of discourse began to be heard from the Athenian bema, - an eloquence founded on nature and truth, but aiming at ideal excellence under the conscious guidance of art.

Whether he obtained a verdict, we are not informed. But from that day he was the first advocate in Athens, the recognized master in forensic oratory. The courts during the years immediately following were crowded with cases. It was difficult for the most peaceably inclined to avoid litigation. In the humorous complaint that Lysias puts into the mouth of a wealthy client, matters had come to such a pass that even the unborn children of Athenians shuddered to think of the litigation in prospect for them when they should come into the world. Now the average man might not care to trust to his own legal or rhetorical skill, and the services of an able speech-writer would be in demand. An advocate could render better service to his client by writing a speech for him to deliver, than by personally appearing in court to assist in the conduct of the case. Lysias, therefore, deprived of his fortune, became a professional logographer, and during the remainder of his long life was so successful in his practice, that, out of all the cases intrusted to him, he lost, we are told, but two.

Little is known of his subsequent career. Cicero relates, but the
story is not well authenticated, that when Socrates was awaiting his trial, Lysias brought him a carefully written plea for his defence, which, however, the philosopher declined to use. It has been supposed that he took a more prominent part in political affairs after his reputation in practical oratory had become established, but as to this we have no certain information. A passage in Oration XIX. speaks of his having been member of an embassy to Syracuse, to the court of Dionysius the Elder, but the reading is disputed. Once he becomes a conspicuous figure to all Greeks, and this is his last appearance on the page of the historian. It was in $388 \mathrm{~B} . \mathrm{c}$. (according to Diodorus), at Olympia. Dionysius the tyrant of Syracuse had sent a magnificently equipped legation to represent him at the Olympic games, - four-horse chariots to contend in the racecourse, distinguished rhapsodists to recite his praises, tents richly adorned with purple and gold, - a spectacle of dazzling splendor such as the festival for many years had not witnessed. But patriotic Greeks could not forget the oppressions exercised upon their countrymen, and the conquests over Greeks by which Dionysius had augmented his power. Lysias gave expression to the popular indignation in one of the patriotic orations that had come to be a part of the quadrennial celebration. In this discourse, of which a fragment only remains, he denounced the Sicilian tyrant and the Persian king as the two great enemies of the Hellenic world. As Diodorus relates (see the fuller narration given by Grote, Vol. XI. pp. 29-34), the multitude were powerfully wrought upon by the speaker, and at once carried away by the impulse of the hour, made a violent assault upon the tents of the legation. At all events the legation proved, so far as its political design was concerned, a complete failure.

## II. HIS STYLE.

The style of Lysias is peculiarly difficult to describe, or to illustrate by quotation of detached passages. Each of his orations must be read as a whole in order to appreciate its character as a work of art, - such a work of art as goes far to satisfy Plato's requirement in a discourse, that it should possess a sculpturesque beauty like that of the idealized human form. The writings of

Lysias have for us a twofold significance : besides being the products of a rare literary genius, a collection unique in forensic oratory, they constitute an epochal creation in Attic prose, marking a new stage of advance in the literary development of Greece. I shall here only enumerate briefly the leading characteristics of his style as compared with that of other writers, and thereby attempt to reach a statement of the fundamental principles of that department of art in which he was in that age a creator, and still remains an acknowledged model.

In regard to the diction and composition of Lysias, modern critics, to the extent that they find themselves competent, have but confirmed the judgment of the ancients, particularly Dionysius of Halicarnassus. The latter made his style the subject of a special treatise. He pronounces Lysias the standard of Atticism, particularly of the so-called "plain" style (i $\sigma \chi$ vóv, Lat. tenue*), as distinguished from the "grand."

His diction is the purest Attic, not the old Attic, Dionysius tells us, which Plato and Thucydides sought to retain, but the current idiom of his own day. He uses the best vernacular of contemporaneous Athens. Though he was of Sicilian parentage, and had lived a number of years in Italy, he is, in respect to the choice of words, an Athenian of the Athenians. It is Quintilian whose cutting criticism exposes the fatal defect of the Asiatic school of oratory as contrasted with the Attic ; the former fails, he says, in finding the proper word. Now Lysias has the conspicuous merit of always having at his command right words (kúpea jvómata), the nearest and best understood words to express the things meant. Thus he selects the concrete rather than the abstract, the specific rather than the general, and avails himself of the materials of current speech in preference to those drawn from poetry and the grandiloquent, semi-poetic diction of the then prevailing oratory. It is to be remembered that prose was not yet freed from the trammels of poetry; it was an almost unheard-of thing that the literary artist could abandon metre, and mould his creations from

[^1]Jebi's Altic Orators, Vol. I. p. 162.
the clay of common speech. The success of Lysias in this direction drew admiration even in the times of Dionysius. The latter says: "He seems to talk like the uneducated, but yet in a manner superior to them. He is a master composer in the unmetrical style, having found a peculiar harmony, by which his diction avoids clumsiness and vulgarity, and becomes elegant and graceful."

In regard to composition his style stands in marked contrast with that of Isocrates. The elaborate periods of the latter are famous. His long and flowing sentences, framed with symmetrical completeness, and obeying with the nicest care the rules of euphony and rhythm, were the delight of many of the ancient rhetoricians. Lysias adopted a looser, freer structure, more like the language of conversation, yet not without an artistic finish and rhythmical movement of its own.

In general it may be said that his style is characterized by the primal merits of perspicuity, force, and beauty. Its simplicity and terse directness contribute in a marked degree to its perspicuity. Absence of embellishment is a noticeable feature; there are few rhetorical figures. The orator seems unwilling to have the attention diverted for an instant from the clear, sharp outlines of his narrative or argument. He presses on certo agmine, "with unerring march," - to use a phrase of Virgil's, - wasting no words and never losing sight of his main end. His sentences are condensed without being harsh or obscure. Dionysius declares that he surpasses Thucydides, and even Demosthenes, in the respect that he scarcely ever leaves the reader in doubt as to his exact meaning. Force, the next of the leading qualities named above, is not so obviously characteristic of single passages, though, as Cicero remarks, "In Lysia sæpe sunt etiam lacerti, sic ut fieri nihil possit valentius"; you do not feel a succession of blows, but a sustained energy, imparting vigor and rapidity to the entire discourse.

It is in narration that Lysias appears to the greatest advantage. His power is shown not so much in cogent logic, as in clear graphic statement. Apparently forgetting the occasion for argument, he proceeds to present the facts as he views them, making the listener an eye-witness or a participant, and awakening him insensibly to an interest in the persons and the transaction. With a constructive faculty singularly felicitous and rapid in its working, he brings to view the circumstances of the case, together with the various
machinery of cause, motive, and incident, until the fabric he has reproduced stands like a present reality before the mind of the hearer. When the statement of the case is complete, argument seems unnecessary. As examples of this effective narration, two passages may be cited: one in Oration XII. (§§4-24), placed first in the present volume, and the other in the Oration on the Murder of Eratosthenes ( $\S \S 5-28$ ), in which Euphiletus, an Athenian citizen, defends himself for having slain the deceased, taken in adultery with his wife, - a picture of manners not surpassed for vividness in Greek literature.

His success as a writer of speeches for clients was due largely to a rare power of personation, the so-called ethopoeia. With the art of the dramatic poet or the novelist he divests himself of his own personality, and composes a speech in a style and tone befitting the client by whom it is to be delivered. Says Selden, in his TableTalk, "He that is to make a speech for the Lord Mayor, must take the measure of his Lordship's mouth." Lysias was not only the first among advocates to recognize this principle, but he carried it into practice with admirable success. The speaker, whether a pauper asking for a continuance of his pension from the public treasury, or a wealthy land-owner repelling the charge of sacrilegious trespass on temple properties, pleads his cause with the skill of a practised advocate, but in forms of thought and speech natural to himself. Each oration was thus, in a new sense, a work of literary art, having an individuality of form corresponding to its inward idea, yet complying with the requirements of that exquisite taste for structural proportion that belongs to the best period of Greek art. The chief defect observable in respect to rhetorical form is in arrangement of argumentative topics; in some of the orations a stricter logical order would seem better adapted to strengthen the effect of the whole. Even here, however, there may have been a deliberate choice of a careless and apparently unstudied arrangement.

On another point I cannot do better than quote the following paragraph from Professor Jebb's admirable chapter on the Style of Lysias:-

[^2]sense of his Greek critic apprehends a certain nameless grace or charm, which cannot be directly traced to art, which cannot be analyzed or accounted for; it is something peculiar to him, of which all that can be said is that it is there. What, asks Dionysius, is the freshness of a beautiful face? What is fine harmony in the movements and windings of music? What is rhythm in the measurement of times? As these things baffle definition, so does the charm of Lysias. It cannot be taken to pieces by reasoning ; it must be seized by a cultivated instinct. It is the final criterion of his genuine work. 'When I am puzzled about one of the speeches ascribed to him, and when it is hard for me to find the truth by other marks, I have recourse to this excellence, as to the last piece on the board. Then, if the Graces of Speech seem to me to make the writing fair, I count it to be of the soul of Lysias; and I care not to look further into it. But if the stamp of the language has no winningness, no loveliness, I am chagrined, and I suspect that after all the speech is not by Lysias; and I do no more violence to my instinct, even though in all else the speech seems to me clever and well finished ; believing that to write well, in special styles other than this, is given to many men ; but that to write winningly, gracefully, with loveliness, is the gift of Lysias.' "

It remains briefly to answer the question hinted at in the beginning of this section, What are the fundamental principles of the Lysian oratory, considered, namely, as prose composition?

Without assuming to have made an exhaustive analysis, I consider that there are three or four that are entitled to special consideration.

1. Truthfulness. The general historical accuracy of Lysias I shall have occasion to mention afterwards. The point to be noted here is that truthfulness is a determining element in his style. The clearest possible exhibition of fact as the groundwork of all persuasion, - this idea is a ruling one in his work. He begins no argument without having first attained a clear, coherent conception of the case, so thoroughly elaborated in all its parts and relations that he is able to transfer it to the minds of others with a distinctness extraordinarily impressive. The success of his niethod is of course largely due to an imagination of unusual power; with that, however, there was the still rarer faculty or quality, whether we consider it native or acquired, of intellectual honesty. This is habitually regulative of his imagination. He is intent on the mastery of the facts, and furthermore does not rest satisfied short of
the utmost possible clearness and precision in the expression of his conceptions.

In general, his work bears the impress of an open, truthful nature; he is a man who sees facts and believes in their reality and their power, who is averse to exaggeration, and who will not strain after effect. A later rhetorician quotes him as saying that "it is not by the style that one's thought is made great or small; the thought is great that contains much, and small that contains little." He says plain things in a plain way. For common things he uses common words. Thus it was not alone purity of diction that charmed his critics, but the peculiar harmony of thought and expression. Hence his freedom from mannerism, and his perpetual freshness : hence an art so admirable that it impresses every reader, but eludes analysis, and defies imitation.
2. His style recognizes the insufficiency of the decorative principle in literary art. This topic is closely connected with the preceding, and is indeed derivable from it, yet deserves separate mention. The Sicilian school aimed at beautiful expression; the Asiatic school strove to be ornately dignified and grand. Both clung to the form irrespective of the thought, and sought to make oratory impressive by its externals. Atticism, the school which, as has been observed, has Lysias as its most conspicuous representative, constantly demanded that discourse should express thought; it was not so much to adorn, enrich, ennoble thought, as to express it. Lysias perceived that embellishment could not be made the leading motive. The thought, - and by this we are to understand not merely the facts and their relations, but the emotion, the purpose and conviction of the orator, all that in his soul which he would transfer to the mind of the hearer, - this must give form and mould to the discourse.
3. It aims at the control of the will primarily through the intellect. Reliance on intellectual conviction as most certain in the end to influence the will is everywhere characteristic of the method of Lysias. We cannot therefore wholly accept the statement of Professor Jebb, that "the broadest characteristic of modern oratory as compared with the ancient, is the predominance of a sustained appeal to the understanding." It is true that modern oratory, far more than the ancient, goes back to fundamental principles, linking and riveting its conclusions to them by long chains of logic, while the latter relies on personal motives and prejudices, uses a great variety
of precedents and examples, and employs obvious arguments drawn from the circumstances of the case. But it is eminently characteristic of Lysias that he adheres to the principle of effecting persuasion through the intellect rather than the feelings, and that, not alone by working upon the imagination, but by means of reasoning. A minute analysis of any of his principal forensic discourses will show how all the available resources of argument are drawn upon in support of his position. He depends little on impassioned appeal, or on the impulse communicated from speaker to hearer in the transport of the moment. There is manifest a deliberate, self-contained confidence that, if he can make his hearers understand the facts as he does, his purpose is accomplished. Thus the oratory of Lysias, while not in any large sense an appeal to principles, is eminently an appeal to the understanding, whether we use this word as referring to the logical faculty merely, or to the intellectual nature as distinguished from the emotional. He finds his way to the feelings by a cool, clear statement of facts and reasons, rather than by any exhibition of emotional fervor, or by force of the personal magnetism of the orator.
4. Economy of the recipient's attention. There is no need to enlarge upon this point here. That this fundamental principle of effective composition, so clearly unfolded in Herbert Spencer's wellknown essay, is generally regarded in the writings of Lysias, appears from what has been said above in the paragraphs treating of his diction and composition. Indeed, he was forced into compliance with this principle, so far as the economy of time is concerned, by a method not ordinarily applied in modern forensic practice. The laws of the Athenians in some cases, and their custom in others, restricted the pleader to a limited time, and thus necessitated selection and compression of material. He is generally felicitous in the arrangement of words in a sentence, so that the thought is easily taken up as he advances. It should be said, also, that it is under this head we find his most marked defects. A more frequent use of figures would enliven his style, at once quickening the imagination and aiding attention. A structure oftener alternating between the loose and periodic forms would have afforded an agreeable contrast. Demosthenes in this respect improved upon his predecessor, sometimes, however, sacrificing perspicuity in detail in his determination to hold the unflagging attention of the audience to his main theme.

## III. HIS GENIUS AND CHARACTER.

To obtain even in faintest outline a conception of Lysias as a man, is far from being an easy task. We are hindered not only by the remoteness of his age, but by the fact that his life was mainly spent in private, and was devoted to scholarly and professional pursuits. Only a few works from his pen remain to us, and but the slightest contemporaneous notices. We have caught a glimpse of him in considering his style, - it being true of him as of every writer possessed of force and originality of mind, that "the style is the man." There are, however, some additional points of view from which we may contemplate his career with a livelier and more intelligent interest.

To his contemporaries he was known as Lysias the sophist, - the rhetor, - the גoyoypáфos, or advocate. The reader of Grecian history and literature will have become more or less familiar with the import of these several designations. The latter technically and more specifically described his profession. The גoyoypápos (in the forensic signification of the word) was an advocate who composed speeches for clients that were to plead their own cause in court. There were frequent cases then - afterwards they became still more frequent - where advocates served their clients or friends by personally appearing in court to speak in their behalf, and to aid in the conduct of the case. But it was ordinarily expected in Athens that a citizen should plead his own cause ; and if a professional advocate came in person to his assistance, the fact of its being a paid service was usually studiously concealed. Lysias confined himself to writing pleas for his clients to deliver. At the beginning of the fourth century before the Christian era he was by far the most distinguished legal adviser and advocate of this class in Athens. His broad and generous culture had long given him rank among the foremost of the sophists, not devoted to speculative research as were Protagoras and Plato, but to studies of the rhetorical sort. How prominent a place he occupied may easily be perceived from the Phedrus of Plato, as well as from the manner in which the great philosopher elsewhere singles him out for hostile criticism.

Of his personal appearance we have no historical record. The language of Aristides the sophist (about A. D. 175), "I saw" (in a
dream) "Lysias the orator as a comely young man" (עєavíokov oik $\left.{ }_{a}^{\prime} \chi a \rho \iota \nu\right)$, may have been founded on tradition, or on the representation of him in then existing statues. In private it is probable that his morals were not above those of the average Athenian of his time. His religious attitude can only be negatively inferred; there is little to indicate what were his positive opinions concerning the prevalent religious system, or his temper and convictions regarding the great truths of natural religion, which underlay the popular mythology. In this respect his orations stand in marked contrast with those of Lycurgus, whose reverent tone, to say nothing of the subject-matter of his arguments, reveals a mind deeply imbued with the religious beliefs and traditions of his country.

The most striking trait in the character of Lysias, morally considered, has been alluded to in the previous discussion. I mean his habitual truthfulness. The student who inquires into the historical bearings of his orations will be impressed with their general accuracy, and the evident tone of fairness pervading them. With scarcely an exception, so far as I have observed, his historical statements vindicate themselves, when confronted with others that apparently or really contradict them. In the note on § 17 of the Oration Against Agoratus, I have remarked on one of these instances ; compare also the note on $\S 72$ of the same oration. His merit in this regard is not absolute ; but it must be remembered that if at times we find exaggeration, sophistical reasoning, and partial representation of the facts, we are not to expect in an advocate, and in that age, the impartiality of a historian or a judge.

A noticeable feature is his modesty. That characteristic of his art which led to a withdrawal from view of his own personality, is to be found in the man as well as in the artist. His patriotism and public spirit had been abundantly shown in the contest for the liberation of Athens from the misrule of the tyrants. It would not have been unsuitable, therefore, when he came to plead before one of her tribunals against the murderer of his brother, to allude to his known services in the cause of his adopted country. But about the only allusion to his own part in the work done by the men of Phyle is found in the single word $\eta \lambda \theta_{o \mu \boldsymbol{\prime}}$, we came.

His remarkable vigor and industry are shown by the number of his orations, and by the length and success of his professional career, although it was begun at so late a period in life. His tact
in dealing with men, founded on a penetrating insight into motives and character, has already been assumed in the discussion of the ethopoetic element in his style. That he had humor, we can readily make out. The plea for the pensioned Invalid, Oration XXIV., is especially in the humorous vein. Occasionally he is sarcastic; inveighing against the profligate licentiousness of the younger Alcibiades, he remarks that the young man had evidently despaired of attaining the greatness of his ancestors, except by being vicious in youth as they had been before him.

In a fragment preserved by Athenæus he has this to say of the Socratic Æschines, an incorrigible shirk: " Moreover, gentlemen of the jury, I am not the only person he treats thus, - it is the same with every one else who has anything to do with him. Have not the neighboring store-keepers, to whom he refuses to pay what he has obtained on credit, shut up their stores and gone to law with him ? Are not his neighbors so annoyed that they are abandoning their houses, and renting others farther off? . . . . And so many crowd about his door at daybreak to collect their dues, that the passers-by think it to be his funeral. Also the merchants in the Pirrus have come to the conclusion that it is less hazardous to take a cargo into the Adriatic than to lend money to him."

The reader is probably familiar with his reply to the client who came back dissatisfied with the speech that had been written for him. "When I read it for the first time," said he, "it seemed an admirable discourse; but after the second and third rehearsal it appeared tame and feeble." "You must remember," replied Lysias, "that the judges are to hear it but once."

He is sparing of aphorisms. "Laws will be no better than the law-makers," he says in XXX. 28. "Time is the most convincing test of the truth," XIX. 6r. In Oration XX. (of doubtful genuineness, however) it is finely said of the defendant: "When he might have concealed his property, and thus have avoided rendering assistance, he preferred to have you know his circumstances, in order that, if in any event he should wish to do worong, he might not be able." The reader will recall a similar thought in Rousseau's Confessions.

More is known to us about him through Plato than through any other contemporaneous writer. But to no contemporary is Plato more unjust than to Lysias. The theory of rhetoric that he attributes
to him, however justly it may or may not be assigned to Corax or to Gorgias, was not that of Lysias. Some time before the Phadrus could have been written, he had begun to compose speeches on principles diametrically opposite to those condemned by Plato. The latter explains his own conception of a true rhetoric, as the art of implanting one's convictions in the soul of another ; the votary of this art must therefore from its very nature possess himself of truth, and he must likewise know the souls of men. On this latter point he says :-
"Oratory is the art of enchanting the soul, and therefore he who would be an orator has to learn the differences of human souls, they are so many and of such a nature, and from them come the differences between man and man; he will then proceed to divide speeches into their different classes. Such and such persons, he will say, are affected by this or that kind of speech in this or that way, and he will tell you why; he must have a theoretical notion of them first, and then he must see them in action, and be able to follow them with all his senses about him, or he will never get beyond the precepts of his masters. But when he is able to say what persons are persuaded by what arguments, and recognize the individual about whom he used to theorize as actually present to him, and say to himself, 'This is he, and this is the sort of man who ought to have that argument applied to him in order to convince him of this'; when he has attained the knowledge of all this, and knows also when he should speak and when he should abstain from speaking, and when he should make use of pithy sayings, pathetic appeals, aggravated effects, and all the other figures of speech, - when, I say, he knows the times and seasons of all these things, then, and not till then, he is perfect and a consummate master of his art." *

No one had realized this ideal so successfully, we may say so marvellously, as Lysias. In the forensic branch he was wellnigh "the consummate master of his art." His success was not by a mere knack, nor was it the result alone of practice. It is evident that he had rightly discerned and estimated the conditions of success in his profession, and had theorized upon them. He knew not only "what" was to be said, but, as Plato required, the "to whom" and the "when " and the "how much." We can discern in him the true Socratic of his age in the domain of rhetoric. How far he may

[^3]
## 1NTRODUCTORY SKETCH.

have been stimulated or helped by Socrates in his discovery of the true theory of forensic and practical eloquence it is impossible to determine, but it is certain that the success of his method rests on the same essential principles as the Socratic theory of education.

The defects of his mind are plainly to be seen in his works. We miss the suggestive variety of a more productive imagination, the warmth of a more emotional, sympathetic nature, and in certain passages the sublimity that would have been imparted by a loftier moral enthusiasm. He had an understanding of extraordinary vigor, clear perceptions, large common-sense, keen insight into men, but his nature was not of the largest mould. On the bema his oratory could scarcely have swayed the most powerful natures. He lacked the deep, intense convictions which kept the thunderbolts of Demosthenes at a white heat, and which seem in his greatest moments to have inspired him with transcendent energy. Yet the eloquence of Lysias, if not of the very highest order, was almost perfect in its kind. Addressed to audiences accustomed to be wrought upon by all manner of appeals, it is clear, dispassionate, mainly directed to the intellect. It chooses its means with unerring adaptation, but does not display them. It is the product of an art whose single aim is $\pi \in \hat{\imath} \sigma a \iota \lambda$ 入óy $\varphi$, to effect persuasion by discourse. In this species of eloquence, which is careless of applause, acts indirectly upon the emotions, and is only intent upon carrying its point, - hence studying its audience, and the conditioning circumstances of the occasion, no less than its theme, - in eloquence of this kind, if we are to judge from the verdict of antiquity together with the confirmatory criticism of modern times, Lysias has never been excelled. He seems at the very outset of his professional career to have conceived with singular clearness the nature of his task, and he labored with long-continued and successful industry towards the realization of his ideal in its accomplishment. His best qualities passed over into his work. He did much toward bringing a noble art to the greatest perfection it ever attained. Though not to be ranked in mental or moral stature with his older and greater contemporary, Sophocles, we may nevertheless justly apply to him as a composer of oratorical prose the words of Professor Plumptre concerning the great dramatist : his characteristic and surpassing excellence is to be found in "the self-control and consummate art with which all his powers are devoted to working out a perfection deliberately foreseen and aimed."

## IV. HIS WRITINGS.

There were current in ancient times 425 orations bearing the name of Lysias, but not more than 250 were accounted genuine, - according to Dionysius only 233 . Out of this whole number there are 170 of which the titles have been preserved, or of which some fragments remain. Four of these belong to the class of "Epideictic" orations
 occasions; two of these are extant, one the Olympiac mentioned in the account of his life, the other the Funeral Oration given in this volume. In the class of Deliberative or Political orations ( $\lambda$ ó $\gamma o \iota \sigma v \mu$ ßov̀єutıкui) there is but one, - a fragment forming No. XXXIV. in the existing collections. It was written for delivery in the Ecclesia immediately after the restoration of the democracy, and is probably the earliest production that we have from his pen.

Of the Forensic orations ( Aóyot סıкavıкoi) there are 30 extant ( 22 entire), but not all accounted genuine. The whole number of Forensic orations in the list of titles and fragments is 159 . They relate to a great variety of cases, civil and criminal; impeachments for treason and official misconduct; actions for violation of contracts, and for damage received to property and character ; indictments for murder, sacrilege, and for the crime, likewise capital, of unlawful speculation in breadstuffs; among the pleaders, heirs-at-law, wards and guardians, injured husbands, deserters, archons elect and admirals, - scarcely a phase of Athenian public or private life that does not come into view. A sufficient portion of the original collection has been preserved to show what must have been the historical value of the whole. The courts of Athens more than its political and festal assemblies, perhaps even more than its stage, bring to our view the actual every-day life of its citizens, as well as many transactions of political moment that do not appear on the page of the historian.

Thus with all their merits in point of style and language, the pleas of the great Athenian advocate have a still stronger claim upon the attention of the modern reader. They are rich with information concerning the inner history of their age. It may be questioned whether any contemporary historical documents of greater value have come down to us out of Greek antiquity. They relate to a generation about which we are greatly concerned to know, - more, perhaps, than about
any other during the whole sway of the Hellenic civilization, were it only for the reason that then Socrates lived, and philosophy began. Loss of empire did not dim the lustre of the Attic mind. On the contrary, it was in this generation that the Periclean Athens began to bear its ripest and best fruit. The Athens that saw the beginning of the fourth century before the Christian era is an "intensely luminous point" on the dim background of antiquity. It has a microcosmic history, and its points of contact with the civilization of a free people in the nineteenth century of the Christian era are vastly more numerous than those of any other pagan age. Into this Athens, its streets and markets, its dwellings, its sanctuaries and temples, into its Piræus harbor and along its wharves, the orations of Lysias lead the reader. No Greek can be put into the hands of the elementary student which throws such a strong side light upon the history with which in his subsequent studies he will need to be most familiar. While studying the language of these orations, their narratives and their arguments, he is brought into the midst of the restless enterprise and the strifes of "that fierce democratie" of Athens, and unconsciously he begins to reconstruct its history. An ecclesiastical historian has spoken of the importance of every student's setting foot on the original ground of historic investigation. "However well told by modern compilers, there is almost sure to be something in the original records which we should have overlooked." These orations are not history, but they contain its materials, and how important for its elucidation they have proved, any one may estimate by observing the frequent reference to them in the works of Grote, and in the volume by Boeckh on the Public Economy of the Athenians. Nor is the lover of Greek literature to forget, as he turns these pages, that without Lysias, such was his acknowledged influence on Attic prose and oratory, we should not have had Demosthenes. Along with Thucydides he forms the best introduction to the study of the greatest of orators. Scarcely less a service is it that he leads us into the very court, before the very judges, as it were, in whose presence the greatest of all the pagan world gave utterance to that sublime vindication which Plato has reproduced in the Apology of Socrates.

## INTRODUCTION

## ORATION AGAINST ERATOSTHENES.

Tnificance as beginning a new era in Attic prose, have already been adverted to in the introductory sketch of Lysias and his writings. It is, moreover, the only extant oration known to have been spoken by the orator himself. His brother Polemarchus had been arrested and put to death the previous year by order of the Thirty; the oration is a masterly plea for justice against Eratosthenes as his murderer, the accused having been a member of that body, and also having taken an active part in the arrest.

The nature of the crime charged, and the official relations of the defendant, lead the speaker beyond the mere accusation of a single criminal ; in the latter and larger part of his speech he sets forth the true character of the oligarchic revolution, arraigning its leaders with statesmanlike dignity and eloquence for their murderous and treasonable conspiracy against the Athenian people. Thus, although classed as a judicial oration, it is in many respects, as Blass remarks, the discourse of a statesman, and worthy to be named with the celebrated oration of Demosthenes On the Crown.

The administration of the Thirty Tyrants, as they came to be called, lasted about eight months, from June or July, B. c. 404 , into the following February. They were to draft
a new code in harmony with the aims of the oligarchic party, and for the time being the government of the city was placed in their hands. Their appointment took place a little less than a year after the loss of the Athenian fleet at Agospotami, August, 405. It had been a year of unparalleled suffering in the city. The blockade brought starvation to its doors, and the dilatory negotiations of the treacherous Theramenes had but deferred hope and prolonged misery. Still, with their wonted hopefulness and courage the people clung to the existing constitution, struggling to maintain their own freedom against foes within the city, while defending their national independence against foes without. But a change of government became inevitable after the surrender of Athens to Lysander, towards the end of March, 404. The exiled aristocrats returned in the wake of the victorious Spartan army; the leaders of the popular party were put out of the way in the manner described in Oration XIII. ; then followed the appointment of thirty* of the oligarchic leaders, charged with the legislative and executive duties above mentioned. Their leading spirit was Critias, - resolute, energetic, and with an ambition unchecked by fear or scruple. The Moderates were represented by Theramenes and nine others who had been nominated by him.

The deeds that made this administration a veritable reign of terror, and soon rendered the name of the Thirty Tyrants odious throughout the Grecian world, are sufficiently familiar to the readers of history. Not less than 1500 persons were put to death. Large amounts of private property were confiscated, and even the treasuries and revenues of the temples were not spared. The higher schools were closed, the public teachers silenced, save Socrates, who could not be. $\dagger$ The

[^4]regular courts, including the Areopagus, were suspended, and denunciations from the most infamous informers were received and acted upon without even the form of a trial. Finally, as if to complete their own and their country's degradation, the usurpers introduced a Spartan garrison into the Acropolis, to be maintained at the cost of the city.

Lysias and Polemarchus, being metics, belonged to a class peculiarly exposed to the rapacity of the Tyrants. It was a class for the most part engaged in commerce, democratic in its sympathies, and containing many men of wealth. The Tyrants were in pressing need of money. They governed an impoverished city, and that with the costly arm of a foreign garrison. Lysias and his brother were placed on the list of the ten who were first proscribed. In language simple but graphic the orator describes the whole proceeding, - the visit of the officers, their brutal violence and greed of plunder, the details of his own escape, and the arrest of his brother by Eratosthenes, followed by a summary execution without trial and without even being charged with a crime.

Of Eratosthenes little is known except through this accusation of Lysias. He is mentioned by no other writer of the time except Xenophon. During the administration of the Four Hundred (b. c. $4^{11}$ ), he had been one of the secret emissaries to the coast of Asia Minor to disseminate oligarchic sentiments among the Athenian troops. Frustrated in his attempts, he seems to have returned to Athens, and to have remained till after the battle of Ægospotami. He then becomes a member of the "Ephors," a sort of central executive committee of five appointed by the clubs and secret political societies, - the so-called éraıpía and ovvorooial, - which were intriguing in favor of Sparta and an aristocratic polity. He is next heard of as a member of the Thirty.

The career and character of Theramenes come under searching review in the course of the oration. He had stood forward
to advocate a moderate policy, and to oppose the useless violence of Critias, - a step which cost him his life. His followers were now demanding his enrolment among the martyrs for liberty, and claiming for themselves the benefit of whatsoever popularity might accrue to his memory. Lysias effectually disposes of these pretensions, and exposes him as a cautious, but dishonest and thoroughly selfish politician, who deserved but too well, though it was by unexpected hands, the reward of his faithlessness to the people and his treason to the constitution.

The trial is supposed to have been held between Sept. 2I, 403 , - the day of the return into the city of the patriots under Thrasybulus, - and the close of that year. Jurisdiction in murder cases properly devolved on the Areopagus; but that tribunal, it may be, had not yet been reorganized. The present case appears to have been tried before a dicastery presided over by the King Archon (äp ${ }^{\omega} \omega \nu$ קaбideús), and probably holding its sessions in the Delphinion. In the opinion of Grote* it was on the occasion of a trial of accountability ( $\epsilon^{*} \theta v v a u$ ), which he supposes Eratosthenes and his colleague Phidon to have returned to stand, that this indictment was preferred. We are inclined, however, to believe with Scheibe and Frohberger that the case was simply a trial for murder ( $\gamma \rho a \neq \eta$ ŋ̀ фóvov).

The following brief analysis will aid the student in understanding the oration as a whole:

## 1. Exordium, 8 88 1-3.

II. Argument on the specific charge contained in the indictment.
(1) Statement of facts, 88 4-24.
(2) Examination of the defendant, $\$ \S 25,26$.
(3) Answer to the defence that he had acted on compulsion and was therefore not responsible, $\$ \S 27-36$.

[^5]III. Argument extra causam, arraigning the defendant as particeps criminis with the Thirty.
(i) Examination of his record, - whether he had rendered such services to the state as to offset the crimes of himself and his colleagues, $\$ 837-6 \mathbf{I}$.
(2) Concerning Theramenes, $\$ \S 62-80$.
(3) Contrast between the present trial and those under the Thirty, and denunciation of the advocates and witnesses for the defence, $8 \S 8 \mathbf{1}-9 \mathbf{I}$.
IV. Appeal to the judges, $\S \delta 92-98$.
V. Peroration, $8 \$ 99,100$.

## INTRODUCTION

## ORATION AGAINST AGORATUS.

THIS oration, like the preceding, derives its chief value from its historical contents. It is an accusation of Agoratus for his share in the death of Dionysodorus, who with other leaders of the popular party had fallen a victim to the revolution that brought the 'Thirty into power. It relates some of the nefarious transactions that enabled the oligarchy to succeed in their plans, and to subvert for the second time the ancient republican constitution.

Theramenes, determined to break the spirit of the obstinate Demos, after waiting for three months of famine to do their work, and for Cleophon to be put to death, had at last returned from his second embassy with the terms of peace. Their acceptance was strenuously opposed by the democratic leaders. Among them were Strombichides, Eucrates, brother to the Nicias who commanded the ill-fated Sicilian expedition, - Calliades, and Dionysodorus. Now in order that the oligarchy might carry their scheme into effect, these men too must be removed, as Cleophon had been ; Agoratus, a man of ignoble birth and antecedents, was selected as a fit instrument for the purpose. He had years before managed to secure a reward from the state on the claim of having been accessory to the assassination of Phrynichus. Afterwards he had somehow procured the enrolment of his name as a
citizen; at the time of the events here related he was pretending to identify himself actively with the movements of the popular party. By order of the Senate, which was at the time of the deliberations on the peace with Sparta strongly oligarchic, he was arrested and induced to make a confession implicating the leaders above named, as well as many others, in a conspiracy against the state. They were arrested and dhrown into prison. The peace was then made. Within three months the Thirty were placed in power. One of their first acts was to institute a trial of the imprisoned leaders and sentence them to death. The description of this mock-trial and of the parting scene in the prison forms a noteworthy passage of the oration.

Of Dionysodorus we have no other information than what is here given. He appears to have been one of the taxiarchs for that year. His brother Dionysius, and a brother-in-law whose name does not appear, come forward as prosecutors, the latter delivering the principal accusing speech, one of the unquestioned compositions of Lysias.

The manner of the indictment deserves notice. Instead of the usual indictment for murder ( $\gamma \rho a \phi \grave{\eta}$ фóvov), the prosecutors avail themselves of the so-called process of Apagogê ( $\left.\dot{\alpha} \pi a \gamma \omega \eta^{\prime}\right)$. This process was preferred, it is supposed, in order to avoid the more numerous legal forms and the intervening delays of the other, especially since these would allow the escape of the accused before trial. The Apagogê was a more direct procedure, placing the accused under immediate arrest, and providing for a speedy trial under the conduct of the Eleven before a Heliastic court. The only requisite preliminary was that the accused should be brought before the Eleven, the charges being made out in a bill or indictment which also bore the name Apagogê. In its original form this indictment could only be preferred when the person charged with crime had been taken in the very act ( $\dot{\epsilon} \pi^{\prime}$ av่тофผ́pఱ, in flagranti), but
practice had allowed its application to be extended to any well-known or notorious offences. In the present case, the argument to justify resorting to this process ( $\$ 88-87$ ) is evidently the most difficult part of the speaker's task, and is skilfully thrown, as indeed it well deserves, into the background.

The date is uncertain, but probably not earlier than B. с. 400. Blass conjectures 398 , or even later.

The following is a brief analysis:

## 

II. Statement of facts, originally attested by witnesses and documents, with a résumé of the calamities for which Agoratus is in part responsible, 8s 5-48.
III. Refutation of the anticipated argument for the defence.

The accuser maintains :
(1) A denial of the charge is impossible in the face of the evidence, $\$ 849,50$.
(2) Justification of the act impossible, $\$ 5 \mathbf{I}$.
(3) The plea of compulsion of no avail, §§ 52-54.
(4) The chief guilt not to be thrown upon Menestratus, s̊ 55-57.
IV. Considerations bearing on the character of the accused :
(I) His conduct compared with that of Aristophanes of Colleidæ, 8858 -61.
(2) The valuable citizens lost to the state compared with their murderer Agoratus, a slave and the brother of three notorious criminals, 8 § 62-69.
(3) Exposure of the fraud of his clain to have served the state in the assassination of Phrynichus, and thereby to have gained citizenship, 8 s 70-76.
(4) Not, as claimed, one of "the men of Phyle," $8877-82$.
V. The validity of the indictment defended, ss 83-87.
VI. Denial of the clefendant's claim to the benefit of the amnesty, 8888-91.
VII. Peroration, 88 92-97.

## INTRODUCTION

## ORATION CONCERNING THE SACRED OLIVE-TREE.

AN Athenian land-owner, name unknown, is charged by a certain Nicomachus with having a number of years before extirpated one of the sacred olive-trees of the state. The trial is before the Areopagus. The charge, if sustained, will bring upon the offender the penalty of perpetual banishment and the confiscation of his entire property.

A glance at some facts derived from this oration and other ancient references to the subject reveals a peculiar phase of the Athenian state system, and explains the sternness of the Athenian code regarding this offence.

The olive-trees and groves of Attica formed then, as now, a marked feature in the landscape, and the oil was an important staple of commerce. As in the case of the grain trade, there was a rigid official supervision of the oil product and of the trees themselves. Provision was made by law against any diminution in the number of fruit-bearing trees; a landowner was not allowed to cut down more than two a year from his estate, unless by special permission. Especial care was taken of the sacred trees dedicated to Athenê, the protecting goddess of the state. The culture of the olive had been, from the earliest times, closely connected with the

## VII. CONCERNING THE SACRED OLIVE-TREE. 65

religious legends and institutions of the country. Grafts and shoots from the sacred olive-tree that stood on the Acropolis, and had sprung from the rock at the bidding of Athenê in her contest with Poseidon, had become fruit-bearing trees in various parts of the country; not only in the precincts of temples, but also on private estates. These were the socalled $\mu$ opiau, the sacred trees whose produce was forever devoted to maintaining the worship of the goddess, and to the support of her priests. The penalty for the extirpation of one of these, even an old stump or decaying trunk, has been already mentioned.

Crimes of impiety in general fell within the jurisdiction of the Areopagus, and all matters pertaining to the care of the sacred olives were especially committed to them. They appointed from their own number curators and inspectors (ѐт $\pi \mu \AA \lambda \eta \tau a i ́, \gamma \nu \dot{\omega} \mu \nu v \epsilon \varsigma)$, to whom was intrusted this department of the public business, including the revision of the inventories, the disposition of the produce to contractors, and other like duties.

Before this Council, doubtless seated on the same rockhewn steps where Paul four centuries later addressed the debating philosophers of Athens, Nicomachus - of whom we only know that he was "a young man" - has brought the defendant, a wealthy citizen in advanced life, but without wife or children. An estate formerly belonging to Pisander, who had been prominent in the oligarchy of the Four Hundred, had come into his possession by purchase. It is supposed to have been situated in the deme Acharnæ, to the northward of the city, that being the deme to which Pisander had belonged. It is charged that the defendant has dug up the stump of a sacred olive that had formerly stood on it, - one of the blackened stumps, it may be, which the fires of foraging parties had left as traces of the recent war. The defendant proceeds to show that since the
purchase of the land from Anticles, in the spring of 403 B. C., it had been leased successively to Callistratus, Demetrius, Alcias, and Proteas; the lease of the latter having probably expired shortly before the date $(397-6)$ of the alleged crime ; and he proves by the testimony of several of these that there had been no olive-tree at all upon the estate.

Inasmuch as the prosecution is not supported by the testimony of any eye-witnesses, the remaining arguments of the defendant, comprising the larger part of the oration, might seem to be a work of supererogation. They seem, however, partly designed to expose the malicious and mercenary purpose of the accuser. Should four-fifths of the judges vote for acquittal, he would not only lose his case, but would be subjected to a fine.

The following is a brief analysis :
I. Exordium, $8 \mathbb{8} \mathbf{I}-3$.
II. Statement of the case, $\S \S 4-8$.
III. Refutation of the charge by positive evidence, $\S \S 9-\mathbf{I I}$.
IV. Refutation of the charge on the ground of its a priori improbability and the absence of any assignable motive. Maintained from
(1) The reputation of the defendant, §§ $\mathbf{1 2 - 1 4 .}$
(2) The inevitable publicity of the act charged, $\S \S 15-19$; in connection with which a strong argument is made from the neglect of the accuser to produce witnesses, or lodge complaint at the time, $\S 88$ 20-23.
(3) The circumstances of the alleged place, \$\$24-26.
(4) The circumstances of the alleged time, $\S 27$.
(5) The difficulty of escaping the known vigilance of the authorities, 88 28, 29.
(6) The defendant's course of life hitherto as an upright and patriotic citizen, $88880-33$.
V. Finally, the refusal of the accuser to take the testimony of the slaves when offered, in contrast with the course of the defendant in the case, affords a convincing argument that not only is the charge without foundation, but it is brought from mercenary and malicious motives, 8 s 34-41.
VI. Peroration, recapitulating the leading points in the defence, $\$ \S 42,43$.

## INTRODUCTION

TO THE

## ORATION AGAINST THE GRAINDEALERS.

' You are doubtless aware that we of all people consume the most imported grain." This remark of Demosthenes, in the Oration Against Leptines, suggests a characteristic feature of the Athenian political economy. The territory of Attica embraced about 900 square miles. The soil was better suited to the fig and the olive than to wheat, and the product of breadstuffs fell far short of the wants of its population, - about half a million, as it is estimated, in the time of Lysias.

In the following speech a member of the Senate of Five Hundred, induced by circumstances occurring in one of their sessions, which he clearly and satisfactorily explains, appears against certain merchants, - who are perhaps in partnership as a firm or company, - and prosecutes them for violation of the existing grain-laws. The grain-trade, both wholesale and retail, was jealously watched by the government in order to prevent extortion on the part of dealers, and to guard against seasons of scarcity arising from unchecked speculation. Rigorous laws regulated the traffic, and special officers were appointed to see to their execution. Besides the áropavópot, market-masters, charged with the general supervision of the markets, there were the бıтофйдакєऽ, grail-inspectors, intrusted
with the oversight of the grain-trade alone. According to Bockh (Public Economy of the Athenians, p. 116) there were fifteen of the latter, five of them being stationed in the Piræus.

The importers were called ${ }_{\epsilon}^{\mu} \mu \pi о р о и$, the retail-dealers $\sigma$ เто$\pi \hat{\omega} \lambda a \iota$, or contemptuously, ка́тŋोoL, hucksters. A large majority both of the wholesale and retail dealers appear, as in the present instance, to have been metics. Of the statutes then in force, one, as appears from the oration, provided that no $\sigma \iota \tau о \pi \omega ́ \lambda \eta s$ should buy more than fifty $\mu \epsilon \dot{\epsilon} \dot{\mu \nu o \iota}$ (nearly seventyfive bushels) at a time. A nother statute restricted the dealer's profit to one obol on the medimnus. The penalty was death.

Of course such legislation was as futile as it was unjust and unwise. The severest penalties failed to check speculation. Gain could no more be controlled by law in ancient Athens, the great wheat-market of the Eastern Mediterranean, than in modern Chicago the great wheat-market of the Western Continent. The Athenian courts, accordingly, were constantly occupied with prosecutions of the grain-dealers. Often, no doubt, the charges brought against them were false. They were particularly liable to be preyed upon by the "sycophants," as they were styled, - a class of men who became informers from base and mercenary motives ; often they were instigated by personal enmity, oftener still by the hope that they would be privately bribed to withdraw the complaint ; in case the prosecution succeeded, they had in prospect a share of the fees.

This is one of the judicial processes technically called cioaryє $\boldsymbol{\lambda}$ ía. After a preliminary investigation before the Senate, the case was brought before a Dicastery, or court of Heliasts. The date of the oration is unknown ; judging from § 14, it belongs after $387 \mathrm{~B} . \mathrm{C}$. In arrangement and style it is one of the best extant productions of Lysias. It is also one of the shortest. If delivered as written, it could scarcely have occupied more than twenty minutes, exclusive of the intervals spent in the examination of witnesses.

## INTRODUCTION

## THE FUNERAL ORATION.

"IT was appointed by law in Athens, that the obsequies of the citizens who fell in battle should be performed at the public expense, and in the most honorable manner. Their bones were carefully gathered up from the funeral pyre where their bodies were consumed, and brought home to the city. There, for three days before the interment, they lay in state beneath tents of honor, to receive the votive offerings of friends and relatives,-flowers, weapons, precious ornaments, painted vases (wonders of art, which after two thousand years adorn the museums of modern Europe), - the last tribute of surviving affection. Ten coffins of funereal cypress received the honorable deposit, one for each of the tribes of the city; and an eleventh in memory of the unrecognized, but not therefore unhonored, dead, and of those whose remains could not be recovered. On the fourth day the mournful procession was formed: mothers, wives, sisters, daughters, led the way, and to them it was permitted by the simplicity of ancient manners to utter aloud their lamentations for the beloved and the lost ; the male relatives and friends of the deceased followed ; citizens and strangers closed the train. Thus marshalled, they moved to the place of interment in that famous Ceramicus, the most beautiful suburb of Athens, which had
been adorned by Cimon, the son of Miltiades, with walks and fountains and columns, - whose groves were filled with altars, shrines, and temples, - whose gardens were kept forever green by the streams from the neighboring hills, and shaded with the trees sacred to Minerva and coeval with the foundation of the city, - whose circuit enclosed

> "the olive-grove of Academe, Plato's retirement, where the Attic bird Trilled his thick-warbled note the summer long,"

- whose pathways gleamed with the monuments of the illustrious dead, the work of the most consummate masters that ever gave life to marble. There, beneath the overarching plane-trees, upon a lofty stage erected for the purpose, it was ordained that a funeral oration should be pronounced by some citizen of Athens in the presence of the assembled multitude."

This eloquent description by Edward Everett, in the "Address at the Consecration of the National Cemetery at Gettysburg," fitly introduces the Funeral Oration ascribed by the ancients to Lysias. There are four others remaining: the celebrated oration of Pericles over the first slain of the Peloponnesian War, preserved, though only in substance, in the history of Thucydides ; the second, in the Platonic dialogue Menexenus, Socrates being made to rehearse it as a discourse he had learned from Aspasia ; a third, bearing the name of Demosthenes, but unquestionably spurious and altogether unworthy of such authorship ; the fourth, that delivered by Hyperides over the Athenians who had fallen in the Lamian War.

Besides the Forensic and the Deliberative, the ancient writers made a third class, the Epideictic or "Panegyric" orations, embracing those that were designed not so much to secure any immediate practical result, as to furnish a
display of eloquence for public ceremonies and festivals. In this class belonged the funeral oration, and the one before us was early celebrated as a masterpiece of its kind.

It purports to have been composed for one of the funeral ceremonies referred to above, during or soon after the Corinthian War (B. c. $394-387$ ). The most decisive engagements of the war were naval. On land, Corinth was the base of operations against Sparta; it was held by the anti-Spartan party of its citizens, aided by the allied Bœotian, Argive, and Athenian forces, against the Lacedæmonians and their allies collected from the Peloponnesus. On the part of the Athenians, Iphicrates and his peltasts distinguished themselves in several minor engagements.* The title below is supposed to refer to those who fell in some of the earlier skirmishes (perhaps в. c. $39^{2}$ ) ; but the allusions, in $\S 59$, to the condition to which Greece was reduced by the Peace of Antalcidas (387), if indeed they formed a part of the original discourse, would require us to assign a date as late as the close of the war.

It is aside from the purpose of this Introduction to enter into the critical controversy concerning its authorship, or its merits in point of style. "Pulcherrima et ornatissima oratio," says Muretus ; Blass, on the other hand, pronounces it a "Schaustück sophistischer Beredsamkeit," decorated "mit dem eitelsten Flitter." The reader will at once perceive the difference between this and the other compositions of Lysias. Its merits and its defects, however, are to a great extent those of this species of oratory. The festival and the oration in honor of the dead had become an annual celebration in the time of Plato and Lysias. These annual discourses appear to have been cast in a common mould, mainly following the same order of topics, and abounding in elaborately turned

[^6]phrases that in the lapse of time became the commonplaces of the rhetoricians. In view of the conformity to a fixed type, and the reluctance of all Greek art to disregard traditionary limitations, it would be idle to seek in the funeral oration of that period marked originality either of thought or of style; it is to be remembered, too, both of this and of the Menexenus, that they are eulogies, not histories; hence they are not documents of historical accuracy. As to the authorship of this, not a few critics refuse to include it in the productions of Lysias. But Grote believes it to be genuine, and that the Menexenus was written in competition with it. "Though the name of Lysias," he says, "is not mentioned in the Menexe$n u s$, yet the rivalry between him and Plato is clearly proclaimed in the Platonic Phadrus, and the two funeral harangues go so completely over the same ground, that intentional competition on the part of the latest is the most natural of all hypotheses."* Aristotle (Rhet., III. 15) quotes from § 60, referring to it as "the funeral oration " ( $\tau \hat{\varphi} \hat{e}$ ė兀七тa$\phi\left({ }^{\prime}\right)$, but without naming the author.
Whoever the author, and whenever written or delivered, it illustrates admirably the patriotic eloquence of the time. The recent dead and the surviving mourners form the theme of the closing portion only ( $\$ \S 67-8 \mathrm{I}$ ) of the discourse. In the main it is an exultant review of the glorious part taken by Athens in Hellenic history. Beginning with the mythical age of the Amazons, glancing at the autochthonous origin of the Attic people, and lingering longest on the Persian wars, the speaker tells again the oft-told deeds of old heroic days, rehearsing the achievements of the dead as an example and an inspiration to the living.

## NOTES ON ORATION XII.

In connection with Orations XII. and XIII. the student should read, if possible, Chap. LXV. in Grote's History of Greece, "From the Battle of Arginusæ to the Restoration of the Democracy of Athens after the Expulsion of the Thirty "; also Chap. I. Book V. of Curtius's History of Greece, "Athens under the Thirty." The articles "Dicasterion" and "Dicastes," in Dict. Ant., explain briefly the constitution of the Athenian Heliastic courts; see also Grote, Vol. IV., p. 140 seq., and Vol. V., p. 378 seq. In the title $\delta \nu$ has $\lambda$ ó $\gamma o s$ understood for its anteced.

1. ©ิ àvסpes Sucaotal, judges; Eng. gentlemen of the jury; H. 625, a, As to the use of $\alpha \nu \delta \rho \in s$, see the faulty rendering in the Eng. version of Acts vii. 2 ; кarךү.: H. 738 ; G. 1099. - mavg. 入éyovri, to leave off speaking, H. 98 I ; G. 1580 . The part. agr. with $\mu \mathrm{ol}$ instead of the subj. of $\pi \alpha v \sigma .$, H. 941 ; Goodw. 928, I. - aủroîs: H. 769; G. 1186 ; $\mu$ є́үє
 - $\omega \sigma \tau \epsilon \ldots \kappa a \tau .$, so that not even if one should utter falsehood would he be able to bring more terrible accusations than the existing ones; $a_{\nu}$ belongs with $\delta u ́ v a \sigma \theta a \iota$. On $\psi \epsilon v \delta$., see H. 969, d; G. I 563, 5. - eimeiv has $\tau \alpha \lambda$. for its obj. and is understood with äтаעтa. - $\dot{\alpha} v a ́ \gamma \kappa \eta$ : subj. of ( $\dot{\epsilon} \sigma \tau i)$, and having the foll. infinitives dep. on it ; tr. on the contrary, either the accuser must fuil from exhaustion, or the time run short.
2. $\pi \epsilon\llcorner\sigma .(\pi \dot{\alpha} \sigma \chi \omega)$, to be about to experience the opposite of (what we have experienced in) times past; Evavt. has a compar. force, hence foll. by $\eta$, than; тр'े тоv, before this, former, here used as adj.; cf. H. 655, d; G. 984. The contrast referred to is explained in what follows, i. e. there is on this occasion no need for the accuser to explain the motive of the prosecution, the occasion of enmily ( $\chi \notin \rho a \nu)$. In тทेV $\chi^{\chi} \theta_{0}$, notice the pro. lepsis, H. 878. The terms usually applied to parties in a trial are :
o $\delta \iota \omega \in \omega \nu$, the prosecutor, the complainant; cf. in Scotch law "pursuer."
o кат $\eta \gamma o p \hat{\nu} v$, the accuser, he who makes the accusing speech.
i фev́rwy, the accused, the defendant.

Still more worth attention is the hurried inventory here given of the personal property found on the estate of a wealthy Athenian resident. A large part of it consisted of slave workmen. Thus also the father of Demosthenes owned fifty slaves, mostly employed in the sword factory. The institutions and social life of the Athenian state can be but imperfectly comprehended by one who does not bear in mind that it was mainly a community of slaves. According to the census of the population of Attica taken about three centuries B. C., there were $2 \mathbf{2}, 000$ free citizens, 10,000 resident foreigners, and 400,000 slaves. Concerning the price and treatment of slaves, interesting details will be found in Becker's Charicles, Excursus VII. Closely connected with this state of things was the growing contempt of manual labor and trade by the Athenians and Greeks generally, as unworthy of a freeman, - a contempt which in the time of the Roman dominion set them to living by their wits, and made them the sharpers and adventurers of the ancient world.

The Thirty took pains to implicate in their crimes as many prominent citizens as possible, thus making them interested as a matter of personal safety in the continuance of the oligarchy. They ordered Socrates, for instance, to take part in the arrest of Leon. The speaker, then (according to the interpretation mentioned above), means to assert that this proceeding against the metics was evidently not one in which the Thirty would force Eratosthenes to guarantee his fidelity.  if the speech is written as delivered, Lysias could not have been speaking much more than half an hour; he may, however, have been on his feet a much longer time, and perhaps engaged during a part of it in crossexamining the witnesses who had been previously called up. 62. In this passage $(62-78)$, the course of Theramenes is sketched with an unsparing hand ; it is the sketch not of an historian, but of an adversary ; yet all the facts stated accord, so far as known, with other received authorities. He had the talents of a demagogue with the temper of an aristocrat. His virtue as a politician was moderation, and it is this that must have commended him to Aristotle, who pronounced him one of the best of Athens' citizens, - a verdict that subsequent history has been far from ratifying. His polished, persuasive eloquence commended hin to the people, and undoubtedly in foresight and other intellectual qualities he stood among the foremost men of the latter half of the Peloponnesian War. But he was destitute of fixed principles; he seems to have been wholly controlled by personal vanity and ambition. His political instability won for him, acc. to Xenophon, the nickname of Cothurnus, the stage-shoe that fitted either foot. His moderation, indeed, seems hardly to deserve the name of a virtue; he was not like Halifax, as described by Macaulay, a "Trimmer"
on principle，but by policy ；nor does he deserve，either as a statesman or as a patriot，to be ranked with the English nobleman．Unless history has much distorted the facts of his conduct in the trial of the six generals after the battle of Arginusæ，and during the siege of Athens after Ægospotami，he richly deserved the fate that befell him．That very death，however，par－ tially redeemed his reputation．He had fallen a victim to a more vindic－ tive，if not a wilier foe of the people，－the insatiably ambitious and the relentless Critias．With this temporary halo of martyrdom around him， brightened by the memory of his eloquence and his gallant bearing when taken to be executed，his name was put forward by the Moderates of the oligarchy as a mediator with the now triumphant democracy．Lest the guilty actors in the tragedy now over should thus be screened from jus－ tice，the orator aims to set Theramenes in a true light before his country－ men．

The large majority of the citizens, whose only anxiety was for peace, were captivated by his speech and would not relinquish the hopes aroused by it ; the conspirators exerted their influence to foster this feeling; and Theramenes received the desired powers." The assembly referred to here, and mentioned in the foll. section, was "the assembly concerning a change in the constitution," - the assembly which passed the motion of Dracontides, establishing the Thirty in power, and virtually abrogating the constitution. It seems to have been held shortly after the surrender of Athens to Lysander, which took place (acc. to Scheibe) March 29, 404 B. c. The assembly (or assemblies, - there seem to have been several subsequent sessions) "concerning the Peace," which was held the day after the return of Theramenes from his final mission, is not referred to here. Its deliberations are referred to in Oration XIII., § 15 seq . On the order of the successive sessions, see Curtius, Vol. III., App., Note XII.

## NOTES ON ORATION XIII.

In the MSS. $\boldsymbol{e}^{\boldsymbol{e}} \boldsymbol{\nu} \delta \epsilon 1 \xi \in \omega s$ is added to the title; it is probably a mistake of the ancient editors who confounded the two very similar legal processes $\epsilon \ell \delta \epsilon \iota \xi$ ts and $\dot{\alpha} \pi a \gamma \omega \gamma \gamma \dot{\eta}$. 10. ikeivov, that one, him; more emphatic than aúrby. The rejection of Theramenes, here mentioned, must have been within a year after the battle of Arginusæ and the unjust condemnation of the six generals; the disapprobation of the people may lave been in consequence of the part he had taken in that trial. The strategi were not among the officers chosen by lot (for others see Dict. Ant. "Archairesiai") ; after election they were liable to the trial of qualifications, before the Senate or a dicastery, and might then be rejectel. See Dict. Ant., "Docimasia."
11. els $\Lambda a к \in \delta a i \mu \mathrm{ova}$ : in this account Lysias briefly blends together the two missions of Theramenes, - one to the camp of Lysander, and the other to Sparta. It was in the former that he remained three months. - in $\boldsymbol{\lambda} \dot{\omega} v$ :
 $\xi \omega v$ : causal. We may render : went to Sparta and remained, ...leaving you besiegred, though he was azvare. Frohb. considers кaràıтн́v to be causal after eiठ̀'s.  held．A word here on an alleged inaccuracy of Lysias．Grote has placed these proceedings，related in $\S \S 18-38$ ，after the surrender of the city and the entrance of Lysander（VIII．235），referring especially to Xenophon， Hell．II．2，22，in proof that Lysias has misdated the occurrences in order to strengthen his plea．But the two accounts are not in conflict．Xenophon condenses into less than a dozen lines the announcement of the conditions of peace，their acceptance and ratification，the triumphant entrance of Lysan－ der into the city，and the beginning of the demolition of the walls in accord－ ance with the terms of the treaty．It is fair to interpret his statement in the light of Lysias＇s circumstantial narrative，instead of assuming that the announcement of Theramenes and the final vote on the acceptance of the peace both took place on one day in one session of the assembly．Had the advocates for the prosecution presumed on the poor memories of the entire
body of judges concerning events so recent and well known, the documents brought into court must of themselves have made such a distortion of facts ineffectual. The narrative given by Plutarch in the life of Lysander also implies that some days intervened between the assembly mentioned by Xenophon and the entrance of Lysander. It is an assumption on the part of Blass that they took place on the same day ; a statement that Xenophon

The discordance between the accounts given by Thucydides and Lysias （referred to by Grote in his note，p．85），is not material．The statement of the former evidently needs to be supplemented and corrected by that of Lysias，whose several references to this event are consistent with each other， and in part corroborated by other sources．The speaker＇s rehearsal of some of the details（not elsewhere given），is necessary in order to show that Ago－ ratus has not the slightest legitimate claim to citizenship，－a fact doubtless sufficient，if proven，to turn the verdict against him．In § 75 he further turns the argument into a dilemma．Suppose Agoratus did have a hand in the assassination of Phrynichus ；the latter was an oligarch whose death the present oligarchy，the Thirty，would have been only too ready to avenge upon Agoratus when he came into their power，had he not earned their favor by doing irreparable damage to the popular party．Among other rewards for this assassination，Apollodorus received an estate in the out－ skirts of the city that had belonged to Pisander，and had been confiscated ； mentioned in Orat．VII．4．－ $\boldsymbol{\beta a \delta i f o v \tau t , ~ a s ~ h e ~ w a s ~ w a l k i n g . ~ - к а т а ~} \beta$ a入入єь лarágas，fells him with a blow ；the part．is adverbial ；H． 969, a ；G． 1563,3 ． The speaker has in mind to show that the manner of Phrynichus＇s death gave no room for the assistance of Agoratus．－äцa тоv́тч，thereupon．－oüre $\pi$ apek $\lambda \boldsymbol{j} \theta \eta$ ，was neither called in to help．

Out of the ruins of the Acropolis were dug up, in 1845, some fragments recording, it would seem, the decree proposed by Diocles, conferring the gift of citizenship upon a certain Thrasybulus of Calydon and others, - the very document, doubtless, which Lysias causes to be read in evidence on this trial. The orator speaks of this record as also containing the names of those who had rendered services and were, therefore, acknowledged as benefactors ( $\epsilon \dot{\varepsilon} \in \rho \gamma \epsilon \tau a \iota$ ), though not rewarded with citizenship. It is found that these fragments include among the latter the name of Agoratus (KAIAFOPATO), with the final sigma missing.

It seems, too, that $\tau \hat{\omega} \nu \tau \epsilon \tau \rho a \kappa o \sigma i \omega \nu$, here and below, is loosely applied so as to include the Four Hundred and their active adherents. Otherwise it would hardly be said that they afterwards composed the whole body of the Thirty, besides the Senate convened under them. It is to be said, however, that of the whole argument this portion, $\$ 873-76$, will least bear inspection. The argument implies a wholesale and violent expulsion of the oligarchs, such as did not by any means take place. Nor was the death of Phrynichus in any such degree the cause of the overthrow of their government, that it should have been a main point with the party to avenge his death, when another revolution restored them
to power in the city. The Thirty, especially, were less likely to be the avengers of Phrynichus, since Critias, their leading spirit, had been his active opponent. Intent on constructing an effective dilemma, the orator misrepresents the situation, without making statements directly false. What is said in $\S 76$ is more to the point.

## NOTES ON ORATION VII．

The title is：＂A Defence before the Areopagus concerning the Sacred Olive－Tree．＂ APEOII．：adj．masc．；sc．$\lambda \delta$ бos．AIIO ¿HKOT ：$\sigma \eta \kappa b$ s originally signified a pen or enclosure；next，a sacred enclosure or sanctuary，often，for instance，an olive－yard，or vineyard；finally it came to be ap－ plied，in a still more specific sense，to the old trunk or stump of a sacred olive． This last signification，it will be observed，is distinctively Athenian，as is the use of the word $\mu o p i a$ ．See L．\＆S．，on è $\lambda a l a$（the true Attic form was $\epsilon \lambda \alpha^{\prime} \alpha$ ）and $\mu o \rho i \alpha$ ． ＇Eגau＇sv，an olive－yard（cf．H． 463 c），is the Greek name for the Mt．of Olives，near Jerusalem．

1．$\beta$ ou入ทㅁ ：the court of the Areopagus was addressed by the same title as the Senate of Five Hundred．－ӓүоvть：H． 969 ，d；G． 1563 ，5．－тра́үната： often a difficult word to translate ；in XII．3，it refers to litigation；here， more general，difficulties．－бvкофávтavs：H．775；G．I179；see also note on XXII．1．－el $\pi \omega$ ：the clause to be completed from what follows，i．e． тoùs．．．toecoal．－$\delta \in i v . . . \delta_{\text {．}}$ ，that even unborn children must nozv be afraid；humorously hitting off the Athenian фi入oveukia，that had become in Lysias＇s time so serious an evil ；on $\mu \boldsymbol{\eta}$ ，see H．1025，1026；G．1612．－ kotvoi：pred．adj．foll．by dat．；the perils are becoming common，i．e．like perils befall the innocent and guilty．

2．$\tilde{\omega} \sigma \boldsymbol{T} \epsilon$ ：following oür $\omega$ ，as here，it should properly introduce a cl．of manner ：but the speaker omits that，and proceeds in this cl．to explain the cause of his embarrassment．Render ：and the trial is made embarrassing to me in this respect，namely，that at first，etc．The sent．fully expressed would read：the trial is made so embarrassing to me，that（I am required to meet a changed indictment ；for）at first，etc．－ 8 e．．．vvvl．．．dapaviţetv， note，on the contrary，they assert that it was an olive－stump I removed； the time denoted by doav．in both cl ．is to be understood from the context ； cf．Greek Moods，96；пробท́єのav：i．e．those who conducted the prosecu－ tion，－seeking from those who had formerly been contractors for the annual product evidence that there had formerly been a fruit－bearing olive－tree on

 the rel. is put in the gen. by attr. instead of the accus. after $\epsilon \pi \iota \beta$. We may render freely: though I have just heard of what he has contrived against me and brings into court, at the same time as you who are to judge concerning the case; lit. of those things which having contrived against (me) he has come, referring to the change of accusation after the appearance of the parties in court. After áxov́cavta I have added a comma to the text. Baur takes $\pi \epsilon \rho i \tilde{\omega}_{\nu}$ as ref. to $\pi a \tau \rho(\delta o s$ and oúcias. Both text and rendering are uncertain.
4. Пetrávסpov: H. 732, a ; G. 1094, 1. This is the Pisander who was prominent in the revolution of 4 II. See Grote, VIII. p. 13 seq.; on the confiscation here mentioned, see p. 88, ibid. - $\delta v \tau \omega v$ : $\tau \grave{\alpha}$ bvia is sometimes syn. with $\dot{\eta}$ ovola; H. 966, a. Apollodorus was one of the two who claimed to have slain Phrynichus, and this gift seems to have been part of his reward. Cf. XIII. 71. - $\boldsymbol{\varepsilon}^{\omega} \omega \nu$ ov́ $\mu \eta v$ : the aor. $\mathfrak{\epsilon} \omega \nu \eta \sigma a \dot{\mu} \eta \nu$ not being used in Attic, the imperf. appears to be sometimes used with an aor, meaning
 Thrasybulus, in the spring of 403 .
5. ทำט̂pat...aंmo反., I consider it therefore my task to show. - тоv̂... Xpóvov, for the previous period; gen. after $\grave{\eta \mu u o \hat{\sigma} \theta a t \text {, acc. to the principle }}$ stated in H. 745; G. 112r. It should be observed, however, that the grammars give no similar instance of the gen. with this verb. The meaning is: that he should not suffer the penalty for trespasses committed during the period before he came into possession of the property. - $\delta_{\imath}{ }^{2} \eta \mathfrak{\eta} \mu \mathrm{a} s$ : see note XII. $5^{8}$; ovidèv...kเvס., we ought by no means to be indicted as criminals for the offiences of others. The conclusion of an abridged syllogism, but stated in such a form as to suggest the requisite major premise. The reasoning is : No one ought to be held guilty of crime committed by another ; if, therefore, the offence charged was not committed by us (and it was not), we ought not to be held guilty.
 the occupation of Decelea, in 413 , the Athenians themselves took care to leave in the outlying fields and farms near the city as little as possible that could afford plunder to the foraging parties of the Spartans. The use of the word $\phi i \lambda \omega \nu$ seems to refer to the foraging parties from the Piræus after the civil war began, though that period does not properly belong to the $\pi \rho o \tau \epsilon \rho o u$

A great deal of barbarism and cruelty underlay the intellectual culture of even the Greeks and Romans. The orator Lycurgus (Against Leocrates, § 29) speaks as if it were too well understood to need argument, that justice and the public welfare were alike subserved by torturing the slaves of an estate or household, both men and women, in order to elicit evidence concerning the master. In the present instance, the master offers them for torture in his own defence. The worthlessness, as well as the detestable cruelty, of this method of ascertaining the truth, seems slowly to have reached men's minds, - how slowly, the criminal codes and procedure of mediæval and even of modern Europe can show.

## NOTES ON ORATION II.

On the "Ceramicus," see Dict. Geog., I. p. 303, "The Outer Ceramicus and the Academy." Interesting details concerning the tombs are given in Dyer's Ancient Athens, p. 492 seq. The student is also recommended to read the Platonic dialogue Mcnexenus, in Jowett's admirable translation. It should be said, however, that the introduction by the distinguished translator scarcely does justice either to the merits of the discourse contained in the dialogue, or to the significance of this class of orations in republican Athens. The student will find in the Menexenus many points of suggestive contrast with this oration, which, if the theory of Schleiermacher and Grote (mentioned in the Introd.) be correct, is invested with additional interest as a contemporaneous and rival production.

1. ${ }^{2} \mu \epsilon \psi$. ${ }^{2} v, I$ should blame; the aor. with $d v$, after an imperf. in the cond., sometimes denotes present time ; $G r$. Moods, 49, 2, N. 5. - тоís...
 at short notice, below ; $\epsilon_{K}$, in the sense of after. That the election of the orator was often left to a late day would appear from Plato: "This time, however, I ain inclined to think that the speaker who is chosen will not have much to say; for the choice has been quite sudden, and he will be compelled almost to improvise." (Menex., III.) - ঠ̀ тâs X, all time; H. 672 ; Goodw. 979. - ovtws...tvyX., that thus they would obtain, etc.; H. 739 ; G. IO99.
2. mpós, with; my discourse is not to vie with their deeds; roves...elp $\mathrm{K}_{\mathrm{o}}$ : the customary eulogy on these occasions embraced the heroic deeds of all the dead whose memorials adorned the Ceramicus. Thus the theme of each speaker was to a great extent the same as that of previous orators. á $\phi 0 \mathrm{oviav}$, abundance; i. e. of themes for emulation. - דoteiv, to compose poetry; in early Eng. make had also this signif. Taylor appositely cites Spenser:-

For other instances of such misplacement of words for rhetorical effect (hyperbaton, as the ancients called it), see XIII. 43, $\tau \hat{\eta} \pi \dot{\jmath} \lambda \epsilon \iota$; XXIV. 21, $\dot{v} \mu \hat{\nu} \nu$; XII. 94, $\nu \hat{\nu} \nu$.
3. Tஸิv троү., our forefathers; $\phi \boldsymbol{\eta} \mu \eta \mathbf{\eta}$, tradition; not legend, as if there were necessarily implied any want of belief in the historic truth of what he was about to relate. History for readers had in that age but just begun to be composed among the Greeks ; they had as yet scarcely attempted to distinguish between legend and history. - кג́к!ivшv : кal =also; the ancient as well as the recent dead. - $\gamma \boldsymbol{\gamma} \omega \mu a r s:$ West. has $\mu \nu \eta \mu a u s$, but the weight of MS. authority is for the former. $\tau \hat{\omega} \nu$ aja $\theta$. is then obj. gen., - the current sayings and anecdotes concerning the brave.
4. The Amazons hold a prominent place in Greek literature, from the Iliad down. Of their invasion of Attica there is frequent mention. Plutarch, in his Life of Theseus, describes the final battle, defining the position and movements of the contending armies, and giving the day of the month in which the engagement took place. Isocrates, in the Panegyricus, refers to the Amazons in language similar to that employed here. Plato, Herodotus, and the ancients generally, believed this nation of warrior-women to have actually existed. Consult Class. Dict.; also Grote, I. p. 208 seq., where an excellent statement is to be found of the views of the Greeks concerning them. The Greek chronologists made Theseus contemporary with Hercules, in the thirteenth century в. c., and during his reign the invasion was supposed to have taken place.

Yáp: see note, XIII. 5 ; oikov̂бat: sc. foav. The Thermodon is a small stream of Pontus, flowing into the Euxine east of the river Iris. It was in this region that the Argonauts encountered the Amazons. - Twิv $\pi \in \rho$ l autás, of those in their region; dep. on $\mu$ bval. - n̄povv, overtook; duve $\pi$., unexpectedly; to their enemies' surprise. - $\delta$ เaфépetv, to surpass; $\dagger$. . $\mathbf{d \lambda \lambda \epsilon i - ~}$ $\boldsymbol{\pi} \mathrm{t} \boldsymbol{v}$, than to be inferior in their forms ; i. e. in size and strength. What is the etymology and original signif. of our word idea?
5. ४рүч, $\lambda$ óүч : the funeral orations seem to have rung all possible changes on this antithesis of deeds and words. Jowett's paraphrase of the Platonic oration in Mencx. felicitously legins: "There is a tribute of deeds and of words." Here the contrast between deed and report - between their own deeds and the report conveyed by others - seems somewhat forced.

Throughout the oration there is an excessive striving after antitheses, - see already in § 4, - a fault vigorously condemned by Reiske: "Mirifice et ad fasticlium luxuriat hac in oratione Lysias, cum antithesis molestissimis, frigus et nauseam creantibus, tum illa perpetua oppositione, sæpe perquam inepta et puerili, inter $\mu e ́ v$ et $\bar{\delta} \epsilon$."

The participial construction also abounds in this oration, participles following one another in some passages instead of adverbial clauses. In many of these cases, it is preferable to translate the partt. by clauses, acc.
 with them and marched. It will be seen that the part. is connected in thought with the pred. more closely than those which precede ; $\pi 0 \lambda \lambda$ ins... Xáptv : Plutarch follows another legend, and says that the war arose in consequence of the carrying off of Antiope by Theseus in one of his expedi-

6. $\mu$.月ov́gaus: H. 969 , a; G. 1563,3 ; тิ̂v 入oumêv: i. e. their future

7. The orator next relates the part taken by Athens in the mythical expedition of the Seven against Thebes. See Grote, I. p. 272 seq. Seven chieftains led their troops against the City of Seven Gates, - Adrastus, Amphiaraus, Capaneus, Hippomedon, Parthenopæus, Tydeus, and Polynices. After their defeat, "Adrastus, unable to obtain permission from the Thebans to inter the fallen chieftains, presented himself in suppliant guise, accompanied by their disconsolate mothers, to Theseus at Eleusis. He implored the Athenian warrior to extort from the perverse Thebans that last melancholy privilege which no decent or pious Greeks ever thought of withholding, and thus to stand forth as the champion of Grecian public morality in one of its most essential points, not less than of the rights of the subterranean gods. The Thebans obstinately persisting in their refusal, Theseus undertook an expedition against their city, vanquished them in the field, and compelled them by force of arms to permit the sepulture of their fallen enemies. This chivalrous interposition, celebrated in one of the preserved dramas of Euripides, formed a subject of glorious recollection to the Athenians throughout the historical age ; their orators dwelt upon it in terms of animated panegyric ; and it seems to have been accepted as a real fact of the past time, with not less implicit conviction than the battle of Marathon." (Grote, I. p. 277.)

The participles in this sentence ( $\S \S 7-9$ ) should be closely studied. The first three are all temporal ; $\sigma \tau \rho a \tau$. and $\dot{\eta} \tau \tau \eta \theta$., however, belong to $\epsilon \dot{\epsilon} \omega \tau \tau \nu$, which latter, denoting a continued state or action in time past, is more

In the latter of the two phrases, $\dot{\varepsilon} \tau \epsilon \rho \rho \omega \nu$ is unnecessary. $-\pi \lambda \epsilon \epsilon \omega$ : cogn. accus. after $\epsilon \xi \nu \beta \rho . ; \pi a r \rho l o v, ~ a n c e s t r a l ; ~ s a n c-~$ tioned by hereditary usage.

II. "After the death and apotheosis of Heracles, his son Hyllos and his other children were expelled and persecuted by Eurystheus; the fear of his vengeance deterred both the Trachinian king Keyx and the Thebans from harboring them, and the Athenians alone were generous enough to brave the risk of offering them shelter. Eurystheus invaded Attica, but perished in the attempt by the hand of Hyllos, or by that of Iolaos, the old companion and nephew of Heracles. The chivalrous courage which the Athenians had on this occasion displayed in behalf of oppressed innocence was a favorite theme for sulsequent eulogy by Attic poets and orators." (Grote, I. p. 94.)

According to the Alexandrian chronologists, Hercules belonged to the generation immediately preceding the Trojan War. They make Eurystheus to have been slain B. C. 120\%. Isocrates says, "long before the Tro-

17. The Athenians are extolled as the natural champions of human rights, by virtue not only of their autochthonous origin, but also of their free institutions. The birth of their race from the soil on which they lived was a favorite theme with the orators in their panegyrics. It was deemed an honor peculiar to the Attic people. In the Iliad, Erechtheus, the oldest name in the Attic genealogy, is said to be born of the Earth : -

Only this passing glance is given to the free institutions and the charac-
teristic civil polity of Athens. For a worthier eulogy based on a discriminating analysis, we must turn to the orations of Pericles.
20. In the following sections $(20-47)$ the orator extols the martial valor and the Pan-hellenic patriotism of his countrymen in repelling the Persian invasions ; the first commanded by Datis and Artaphernes, B. C. 490 ; the next under Xerxes, ten years later. The reader will do well to consult Grote, or, for a more compact narrative, Curtius, Vol. II., the chapter on "The Wars of Liberation."

It then = Lat. itaque, accordingly, and thus, therefore, kal having a connective, $\gamma \dot{\alpha} \rho$ an epexegetic, and roí a confirmative force. For other exx. of this use (distinct from the signif. in which it is more freq. used $=$ Lat. etenim profecto), see $\S 26$; also Demosth., Phil., I. 6 ; De Cor., 99 ; De Falsa Legat., 137 and 325. - кal фúvтes, к. т. $\lambda$., being of noble descent and of one mind; $\boldsymbol{\gamma}$. $\quad$ нota may be understood in two ways: (1) entertaining like sentiments, i. e. the sentiments of liberty, equality, and harmony spoken of above, - an interpretation which Reiske prefers, and which accords with the context; (2) entertaining corresponding sentiments, i. e. sentiments and aims corresponding to their honorable descent. Thus Baur: "ebenso gesinnt." - mavtaxov̂ : used as adj., cverywhere existing.
21. ßacticús: Darius, the son of Hystaspes; тevt. $\mu v p t a ́ \delta o$, fifty " myriads," half a million; the reader will remember that this is eulogy, not history. The number led by Datis and Artaphernes is variously estimated ; see Grote, IV. p. 345, note ; Curtius, II. p. 235, note. 100,000 infantry and 10,000 cavalry is the lowest estimate. In the Platonic oration it is "fifty myriads and three hundred ships"; Menex., X. - Ekovorav, đ̌ovarav: H. 619; they may be rendered, without force, by force. - oftws may be omitted in transl. ; it refers to the condition expressed in the cl.
